According to our (Global Info Research) latest study, the global DIP Switches market size was valued at USD 420.8 million in 2023 and is forecast to a readjusted size of USD 519.8 million by 2030 with a CAGR of 3.1% during review period.

This report studies the DIP Switches market, from angles of Company, regions, product types and end industries, to analyze the status and the future. A DIP switch is a manual electric switch that is packaged with others in a group in a standard dual in-line package (DIP). The term may refer to each individual switch, or to the unit as a whole. This type of switch is designed to be used on a printed circuit board along with other electronic components and is commonly used to customize the behavior of an electronic device for specific situations. DIP switches are an alternative to jumper blocks. Their main advantages are that they are quicker to change and there are no parts to lose. DIP switches enable to configure a circuit board for a particular type of computer or application. DIP switches are always toggle switches, which mean they have two possible positions -- on or off.

Global DIP Switches key players include TE Connectivity, CTS Electronic Components, Grayhill, Omron, Apem(IDEA), etc. Global top five manufacturers hold a share about 20%. In terms of product, Slide-Style is the largest segment, with a share about 50%.
