Abstracts

According to our (Global Info Research) latest study, the global Diphenyl Oxide market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Diphenyl oxide also known as DPO or diphenyl ether is a an organic compound with the chemical formula $O(C_6H_5)_2$. Like other phenyl rings, diphenyl oxide is subject to various reactions like hydroxylation, halogenation, nitration, Friedel Crafts alkylation and sulfonation. Diphenyl oxide is a colorless sticky liquid with a pleasant odor. Diphenyl oxide may sink or float in water depending on its density. Freezing point of diphenyl oxide is approximately 81°F. Diphenyl Oxide is easily reactive with oxidizing materials. Diphenyl Oxide can be used as a heat transfer medium when mixed with biphenyl. Such a mixture is used as heat transfer medium due to its high temperature range. Production of polyamide and polyimide also involves the use of diphenyl oxide when used in the production of phenoxathiin. Moreover, diphenyl oxide is also used as a flame retardant in the production and manufacturing of reinforced plastics and paints. Diphenyl oxide is a key product used as a raw material in the manufacturing of various industrial products namely fragrances, chemical intermediates, flame retardants and heat transfer fluids.

The global diphenyl market is mainly driven by the increasing use of perfumes in soaps and detergents. The high growth in solar power market is also driving the growth of the global diphenyl oxide market. Increasing use of diphenyl oxide in flavoring substances, perfume chemicals and heat transfer liquids are another major factors fuelling the growth of the global diphenyl oxide market. Moreover, low reactivity, low polarity, high solvency, pleasant odor, high thermal stability, high boiling point and high purity (around 99.99%) are some other factors driving the growth of the global diphenyl oxide market. Another major driver boosting the growth of the global diphenyl oxide market is the low

prices of diphenyl oxide thus soap and detergent industries are deploying diphenyl oxide as the key fragrant.
