According to our (Global Info Research) latest study, the global Direct Acting Water Solenoid Valve market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

The direct acting water solenoid valve means that the electromagnetic force directly acts on the valve core system. The action function of the solenoid valve depends entirely on the electromagnetic force and the return spring, and is not affected by factors such as the pressure difference of the medium. It can be started at zero pressure. Due to the large flow rate, the diaphragm can be made of special materials for hot water fluid.
