Direct Part Marking (DPM) Solution refers to a method of permanently marking or engraving information directly onto a product or component. This marking technique is typically used in industries such as automotive, aerospace, and electronics, where traceability and identification of parts are crucial. DPM solutions utilize various technologies like laser marking, dot peen marking, or chemical etching to create durable and readable marks on different materials, including metals, plastics, and ceramics. These marks can include serial numbers, barcodes, logos, or other essential information that can be easily scanned and tracked throughout the product's lifecycle. DPM solutions ensure long-lasting and tamper-proof identification, improving product quality, traceability, and overall efficiency in manufacturing and supply chain processes.
