A Direct-to-Card (DTC) printer is a type of card printer used to create plastic ID cards, such as employee badges, student IDs, membership cards, and more.

Direct to Card printers are designed to print directly onto plastic ID cards. They use a thermal transfer or dye-sublimation printing process to apply the image and text directly onto the card's surface. DTC printers can be single-sided or dual-sided. Single-sided printers print on one side of the card, while dual-sided printers can print on both sides of the card. DTC printers offer high-resolution printing, producing sharp text, images, and graphics on the cards. They can print in full color or monochrome (black and white).
