Abstracts

A dishwasher is a machine that washes dishes automatically. There are two types of dishwashers, which are freestanding dishwashers and built-in dishwashers. Built-in dishwashers unlike freestanding dishwashers are connected to the flow of other kitchen accessories. Dishwashers save time and significantly reduce the wastage of water and energy.

Scope of the Report:

This report focuses on the Dishwasher in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The recent years witness an increased investment from the consumers towards kitchen designs that are sophisticated but easy to maintain. As a result, kitchen designs have undergone a drastic transformation over the past decade with new innovations in terms of color schemes and different kind of cabinets. This changing preference among the consumers encourages manufacturers to add new streamlined appliances to their portfolio such as under-the-sink dishwashers to cater to homeowners who have restricted kitchen spaces.

The dishwasher market appears to be highly fragmented due to the presence of well-diversified international and regional manufacturers. The leading players offer a wide variety of electronic goods to choose from. Regional players in this market are finding it increasingly difficult to compete with The global players especially in terms of factors such as technology, quality, and pricing.

This market study estimates that in terms of geographic regions, EMEA will be the major revenue contributor to the market by 2021. Factors such as high disposable

income, busy lifestyles, and long working hours of individuals in this region, will propel the growth of the dishwasher market size during our estimated period.

The worldwide market for Dishwasher is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
