The global Dispersants market size is expected to reach \$ 8156 million by 2032, rising at a market growth of 1.7% CAGR during the forecast period (2026-2032).

Dispersant or Dispersing Agent is either a non-surface active polymer or a surface-active substance added to a suspension, usually a colloid, to improve the separation of particles and to prevent settling or clumping. The role of the dispersant is to make the dispersion process easier and more stable. Dispersants consist normally of one or more surfactants, but may also be gases.
