Abstracts

Displays are used to exhibit data or information. They are referred to as retail displays when used in retail applications like POS systems, kiosks, ATMs, and digital signage. They can be both touch-enabled and non-touch displays. A growing number of retailers are using interactive displays to attract customers. Retailers have to make sure that their digital displays are technically perfect to attract customers, given the increased consumer use of high-performance electronic devices such as smartphones and tablets. For instance, responsive screens should react quickly to consumer gestures so that shoppers continue to use them and close the sale.

Scope of the Report:

This report focuses on the Display Market for Retail Applications in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Advances in interactive digital signage are primarily driving this market. To attract the attention of users on a large scale, retail manufacturers are resorting to large-size digital display installations. They are also introducing interactive touch displays to usher in a drastic change in customer experience.

As the retail display market is still in its early stages, manufacturers are increasingly adopting technologies such as interactive displays that encourage more human engagement. Digital signage, POS, kiosks, interactive digital signage, and content automation system are gaining traction in the market. During the forecast period, manufacturers are expected to introduce advanced retail display solutions that integrate augmented reality (AR), gesture control, and holographic displays.

The market share for the APAC region is expected to grow steadily during the forecast period. China will continue to be a majority contributor to this region.

The worldwide market for Display Market for Retail Applications is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
