## Abstracts

According to our (Global Info Research) latest study, the global Disposable Coaxial Biopsy Needle market size was valued at USD 31 million in 2023 and is forecast to a readjusted size of USD 39 million by 2030 with a CAGR of 3.4% during review period.

A coaxial biopsy needle is a needle that is used to take a sample of tissue from the body. The needle is inserted through the skin and into the body. The needle is then rotated to take a sample of tissue. The side notch's length, which is known as the cutting length, traps the sample and contributes to its yield.

The image definition of the imaging section of the disposable coaxial biopsy needle is good, and the imaging scale marks make the puncture positioning more accurate. It can be applied to different usage scenarios and sampling places. The edge of the three-section needle tip is sharp, the needle insertion resistance is small, and it is easy to puncture tissue. It has a variety of specifications and models, and has good adaptability to biopsy needles.

The key manufacturers of disposable coaxial biopsy needles in the world include BD, Merit Medical Systems, Argon Medical Devices, TSK Laboratory, IZI Medical, Medax, AprioMed, GEOTEK and Mammotome, among which the top six manufacturers account for more than 50% of the market share, and the largest manufacturer is BD.
