## Abstracts

According to our (Global Info Research) latest study, the global Disposable Contact Lenses market size was valued at US\$ 13010 million in 2024 and is forecast to a readjusted size of USD 17070 million by 2031 with a CAGR of 4.0% during review period.

Disposable contact lenses are designed for single-use and are typically worn for a day before being discarded. Made from soft materials like hydrogel or silicone hydrogel, these lenses offer superior comfort and oxygen permeability. Disposable lenses correct various vision issues, such as nearsightedness, farsightedness, astigmatism, and presbyopia. Compared to reusable lenses, they offer greater convenience and hygiene, making them ideal for users who prioritize ease of use and eye health.

## Market Trends

In recent years, the demand for disposable contact lenses in the Asia-Pacific region has grown significantly, particularly among younger, urban populations. Factors such as the rising incidence of myopia, increasing urbanization, and heightened awareness of eye health are driving market expansion. The convenience and hygiene benefits of disposable lenses have made them particularly popular in fast-paced countries like Japan, South Korea, and China. Additionally, the growing trend for cosmetic contact lenses, including colored and decorative lenses, is boosting demand, as consumers seek both vision correction and aesthetic enhancement.

Leading companies in the disposable contact lens market in Asia-Pacific include Johnson & Johnson Vision Care, Alcon, CooperVision, and Bausch + Lomb. These

companies dominate the market with innovative products and extensive portfolios. Johnson & Johnson Vision Care's Acuvue brand is renowned for the comfort and quality of its daily disposable lenses. Alcon focuses on advanced technologies, particularly in multifocal and astigmatism lenses, while CooperVision excels in lenses designed for special vision needs, including myopia control. Bausch + Lomb offers a wide range of products, from basic vision correction to multifocal lenses for presbyopia.

Market trends show that daily disposable lenses are becoming the preferred choice due to their ease of use, hygiene benefits, and improved comfort. There is also growing demand for disposable lenses with additional features such as UV protection and blue light filtering. Advances in materials, such as silicone hydrogel, are enhancing the comfort and oxygen permeability of these lenses, catering to the needs of consumers who require long-term wear.
