Disposable plastic and paper cups are single-use cups made from either plastic or paper materials. These cups are designed to be used once and then thrown away. Disposable plastic cups are usually made from polyethylene terephthalate (PET) or polystyrene (PS) and are commonly used for cold drinks, such as soda or water. These cups are lightweight, durable, and inexpensive, making them a popular choice for events, parties, and fast-food restaurants. Disposable paper cups, on the other hand, are made from paper that is coated with a thin layer of plastic or wax to make them water-resistant. These cups are commonly used for hot drinks, such as coffee or tea, and are often found in coffee shops and vending machines.
