## **Abstracts**

Disposable slippers, especially non-woven disposable slippers, are suited for one-time usage and are disposed of after a single usage. These slippers find uses in hotels, spa centers, hospitals, and places like residential buildings, aircraft, and beauty parlors.

Disposable slippers are characterized by convenient production processes because of their fixed size. The requirement of fabric in a single product is extremely low. Due to this, the key manufacturers of disposable slippers enjoy the ease of considering merely a limited number of factors during the manufacturing process. One key factor that the manufacturers consider is the slipper size. Disposable slippers manufacturers are in a position to conveniently manufacture a large number of slippers without much difficulty.

### **Scope of the Report:**

This report focuses on the Disposable Slippers in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The increase in disposable incomes and the changing lifestyle influence the growth of the wellness and the hospitality industry. Baby boomers and millennials are the primary consumers of wellness and spa services due to the increasing concern over personal appearances and health. Consequently, the number of spa centers and hotels is exponentially increasing across the globe to cater to the rising demand for spa treatments. This will in turn, fuel the need for disposable slippers fueling market growth. The disposable slippers market is fragmented due to the presence of several established international, regional, and local manufacturers competing based on factors such as price, quality, brand, and variety. New entrants in the guest slippers market focus extensively on heavy investments in R&D and new product development.

Disposable slipper manufacturers are also focusing on sustainable manufacturing and are adopting competitive strategies to enhance their customer base and increase their market shares.

The worldwide market for Disposable Slippers is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
