Abstracts

The global Disposable Toothbrush and Toothpaste Set market size is expected to reach \$ 1218 million by 2032, rising at a market growth of 6.7% CAGR during the forecast period (2026-2032).

In 2025, global production of disposable toothbrush and toothpaste sets reached 3.429 billion units, with an estimated average selling price of US\$0.22 per unit. Disposable toothbrush and toothpaste sets are portable oral hygiene kits that combine a disposable or short-term use toothbrush with a small tube of toothpaste, toothpaste tablets, pre-applied toothpaste, or dental floss in a single, individually packaged package. They are typically supplied in plastic bags, paper bags, cardboard boxes, aluminum-plastic film, or hotel toothbrush pouches. Their core function is to provide a 'disposable, hygienic, and ready-to-use' oral hygiene solution for hotel stays, travel, airlines, medical care, office emergencies, school dormitories, first-aid kits, and institutional bulk purchasing scenarios. The upstream mainly includes handle materials such as PP, PS, and PLA; nylon/PBT bristles; toothpaste base, flavorings, fluoride or fluoride-free formulas; tubes/toothpaste bags; cartons; composite films; labels; and automated bristle implantation, injection molding, filling, and packaging equipment. The midstream includes toothbrush molding, bristle implantation and rounding, toothpaste filling, kit assembly, individual packaging, and OEM/ODM customization. The downstream targets hotel groups, airlines, travel product channels, medical and nursing institutions, e-commerce platforms, convenience stores, and rescue organizations. Gross profit margin is approximately 15%-35%.
