Abstracts

The global Disposable Urine Collection Bag market size is expected to reach \$ 1019 million by 2032, rising at a market growth of 4.8% CAGR during the forecast period (2026-2032).

Disposable Urine Collection Bags are medical devices designed to collect and store urine from individuals who may have difficulty using a toilet, such as patients in hospitals, nursing homes, or those with certain medical conditions. There are different types of urine collection bags available.

In 2025, global Disposable Urine Collection Bags sales volume reached approximately 1.19 billion units, with an average global market price of around US\$ 0.6 per unit.

Demand growth is being pulled by aging populations, chronic disease, and the shift of catheter care from hospitals to home/long-term care. Urine collection bags (often discussed as urinary drainage bags) are seeing steady expansion because more patients live longer with urological conditions, post-operative needs, or mobility limitations?and many of these patients are managed in homecare or nursing facilities where drainage bags are a routine consumable. Market trackers consistently tie growth to rising geriatric populations and higher urology procedure volumes, with mid-single-digit CAGR expectations commonly cited for the broader drainage bag category. Purchasing trends are being shaped by (a) disposables/hygiene positioning and (b) regulatory & materials pressure (especially in Europe). On the commercial side, ?disposable? positioning and hygiene messaging are helping faster growth in certain sub-segments (e.g., single-use urine bags), alongside demand from institutions that want simplified infection-control logistics.

At the same time, manufacturers face rising compliance burden under EU MDR/IVDR-era expectations (documentation, interpretations, cost), which can drive redesign cycles, portfolio rationalization, and a premium on suppliers that can reliably maintain certifications and supply continuity?indirectly influencing pricing, lead times, and vendor

selection in EMEA.
