A disposable vaginal applicator is a single-use medical device designed for the hygienic and efficient administration of medications, such as creams, gels, or suppositories, into the vaginal cavity. These applicators are typically made from plastic, ensuring they are lightweight and easy to handle. The disposable nature of the applicator eliminates the need for cleaning and reduces the risk of infection or cross-contamination, providing a safe and convenient option for patients. Widely used in gynecological treatments, these applicators facilitate accurate and comfortable self-administration of medications, making them an essential tool for personal healthcare management.
