Abstracts

According to our (Global Info Research) latest study, the global Distearyl Thiodipropionate (DSTDP) market size was valued at US\$ 65.85 million in 2025 and is forecast to a readjusted size of US\$ 83.55 million by 2032 with a CAGR of 3.5% during review period.

In 2025, global Distearyl Thiodipropionate (DSTDP) production reached approximately 13 k tons, with an average global market price of around US\$4,910 per ton. Distearyl Thiodipropionate (DSTDP) is an organic thioester compound primarily used as an auxiliary antioxidant and stabilizer. It works by scavenging peroxides to protect materials from thermal oxidative degradation. Its most common commercial application is in the manufacturing and preservation of plastics, rubbers, and cosmetics.

The global distearyl thiodipropionate (DSTDP) market is supported by rigid demand from downstream polymer materials and lubricant industries, presenting a mature and stable profile with clear growth in high-end application sectors. As a long-carbon-chain thioester secondary antioxidant, DSTDP features extremely low volatility and migration, adapting to thermal-oxidative protection requirements of materials under high-temperature processing and long-term service conditions. The downstream demand structure adjusts with industrial upgrading, and sectors such as new energy vehicle high-temperature components, high-end wires and cables, and food-contact packaging materials have raised requirements for material durability and safety, becoming core drivers of market growth.

In terms of competitive landscape, international leading chemical companies dominate the high-end market with mature synthesis processes, global customer networks and

comprehensive compliance systems. Chinese enterprises have gradually broken through product quality bottlenecks through continuous process optimization and technological investment, with steadily increasing market share and rising industry concentration. Against the backdrop of global supply chain restructuring, major manufacturers accelerate regional capacity layout, and leading Chinese enterprises advance overseas production base construction to approach end markets and reduce cross-border trade risks.

Global environmental regulations continue to tighten, imposing stricter requirements on production energy consumption, emissions and product safety, promoting the industry to shift to green and clean production. China's industrial policies support domestic substitution of high-end polymer additives, and the improvement of international regulatory systems such as the EU REACH Regulation has raised market entry barriers, prompting enterprises to strengthen full-life-cycle compliance management.

This report is a detailed and comprehensive analysis for global Distearyl Thiodipropionate (DSTDP) market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Distearyl Thiodipropionate (DSTDP) market size and forecasts, in consumption value (\$ Million), sales quantity (Tons), and average selling prices (US\$/Ton), 2021-2032

Global Distearyl Thiodipropionate (DSTDP) market size and forecasts by region and country, in consumption value (\$ Million), sales quantity (Tons), and average selling prices (US\$/Ton), 2021-2032

Global Distearyl Thiodipropionate (DSTDP) market size and forecasts, by Type and by Application, in consumption value (\$ Million), sales quantity (Tons), and average selling prices (US\$/Ton), 2021-2032

Global Distearyl Thiodipropionate (DSTDP) market shares of main players, shipments in revenue (\$ Million), sales quantity (Tons), and ASP (US\$/Ton), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Distearyl Thiodipropionate (DSTDP)

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Distearyl Thiodipropionate (DSTDP) market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include BASF, SI Group, SONGWON, Rianlon Corporation, Jiangsu Jiyi Chemical Group, UBE Corporation, Suqian Unitech, Reagens S.p.A., Jiangsu Feiya Chemical Corporation, Mayzo, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market Segmentation

Distearyl Thiodipropionate (DSTDP) market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.

Market segment by Type

Powder

Flake

Others

Market segment by Purity

Purity ≥99%

Purity

Contents

1 MARKET OVERVIEW

1.1 Product Overview and Scope

1.2 Market Estimation Caveats and Base Year

1.3 Market Analysis by Type

1.3.1 Overview: Global Distearyl Thiodipropionate (DSTDP) Consumption Value by Type: 2021 Versus 2025 Versus 2032

1.3.2 Powder

1.3.3 Flake

1.3.4 Others

1.4 Market Analysis by Purity

1.4.1 Overview: Global Distearyl Thiodipropionate (DSTDP) Consumption Value by Purity: 2021 Versus 2025 Versus 2032

1.4.2 Purity ≥99%

1.4.3 Purity
