Abstracts

The global Distributed Antenna Systems (DAS) market size is expected to reach \$ 2554.9 million by 2029, rising at a market growth of 8.3% CAGR during the forecast period (2023-2029).

Global distributed antenna systems (DAS) key players include CommScope, Solid, Inc., JMA Wireless, Comba Telecom and Corning. Global top 5 manufacturers hold a share nearly 60%. Asia-Pacific is the largest market, with a share over 43%, followed by North America and Europe. In terms of product, hybrid DAS is the largest segment, with a share about 49%. And in terms of application, the largest application is office buildings, with a share about 20%.

A Distributed Antenna System (DAS) involves the use of several antennas as opposed to one antenna to provide wireless coverage to the same area but with reduced total power and additional reliability. Often times a DAS uses RF directional couplers and/or wireless amplifiers to split and amplify the wireless signal from the source out to the distributed antennas. In many cases a DAS will use a combination of low loss coaxial cabling as well as fiber optic cabling supporting radio over fiber (RoF) technology to distribute the wireless signals to the antennas.

This report studies the global Distributed Antenna Systems (DAS) production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Distributed Antenna Systems (DAS), and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year.
