## Abstracts

The global Distributed Control System (DCS) market size is expected to reach \$ 24700 million by 2029, rising at a market growth of 5.9% CAGR during the forecast period (2023-2029).

Global key players of distributed control system (DCS) include Emerson, ABB, Schneider Electric, Yokogawa, SIEMENS, etc. The top five players hold a share about 36%. Service providers are mainly located in Europe, United States, China and Japan, they occupied for a share over 51%. Asia-Pacific is the largest market, has a share about 33%. In terms of product type, Large Size is the largest segment, occupied for a share of about 44%, and in terms of application, Chemical Industry has a share about 30 percent.

A DCS, to control distributed processes or manufacturing systems, is a control system for a process or plant, wherein control elements are decentralized and distributed throughout the system. This is in contrast to non-distributed systems, which use a single controller at a central location. In a DCS, a hierarchy of controllers is connected by communications networks for command and monitoring. They offer flexibility, extended equipment life, simplicity of new equipment integration, and centralized maintenance when used in an industrial environment.
