According to our (Global Info Research) latest study, the global Distributed Denial of Service (DDoS) Protection and Mitigation market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Distributed denial of service attacks can cause many computers to be attacked at the same time, so that the target of the attack can not be used normally. Distributed denial of service attacks have appeared many times, resulting in many large websites failing to operate. This will not only affect the normal use of the user, but also cause huge economic losses.
