## Abstracts

The container is a component tool that can carry the packaged or unpackaged goods for transportation, and convenient for loading and unloading with mechanical equipment. The greatest success of the container is the standardization of its products and the complete set of transportation systems established thereby. It is possible to standardize a monster with a load of several tens of tons, and on this basis, gradually realize a worldwide logistics system of vessels, ports, routes, highways, transfer stations, bridges, tunnels, and multimodal transport. This is one of the great miracles that human has ever created

### Scope of the Report:

This report focuses on the Domestic Coastal Container in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. First of all, increasing demand for Domestic Coastal Container is expected to result in the growth of the market. This is because coastal shipping is environmentally friendly. For example, the emission of exhaust discharged by coastal shipping is in low level compared with others such as aviation and rail freight. In addition, the price of cost is much cheaper than others transportation. In recent year, governments place emphasis on improvement of environment, Coastal Container Market can be supported by government policy. Second, some countries such as China and India have great demand for Coastal Container due to population growth. It is said that the shipping ministry in India has relaxed cabotage restrictions for ports that transship at least half of the containers handled by them. Transshipment ports that are eligible for cabotage relaxation will now enable foreign container lines to carry export-import (exim) laden and

empty containers between that port and other Indian ports. The government said the move will help India create hubs within the country and cut dependence on neighbouring hub ports. Currently, India is heavily dependent on Colombo and Singapore ports for transshipment. Earlier, only India-registered ships were allowed to ply on local routes for carrying cargo. By easing its cabotage regulations, India hopes to attract more containerized cargo. China has formed several domestic trade port hubs based on the Yangtze River Delta's Shanghai Port, Suzhou Port, Yingkou Port and Bohai Bay's Tianjin Port, so China is expected to grow rapidly over the forecast period. The worldwide market for Domestic Coastal Container is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
