Abstracts

Door phones are a necessity in a modern household. They are simple in structure and are relatively inexpensive. Door phones can be used for both voice communication as well as video communication and are used in apartments, single-family residences or residential buildings, and others. Door phones can also be used in factories as well as different communities to identify the visitors. Video door phone is constructed using power line communication channels. Door phones installed indoors are linked to video door phones outside via the power line.

Scope of the Report:

This report studies the Door Phone market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Door Phone market by product type and applications/end industries.

One of the latest trends gaining traction in the market is the growing construction of residential properties in the US. There has been a surge in residential construction in the US over the last few years and this is anticipated to boost the demand for the installation of door phones for security purposes in the privately-owned houses over the next several years.

The global door phone market is highly fragmented owing to the presence of over 300 vendors operating and selling door phones across the world. The market leaders prioritize product innovation by focusing on R&D facilities and investments. Several new entrants also have a presence in the global door phone market. While the leading vendors have larger resources and diversified distribution networks, smaller companies are entering into partnerships with global distributors. The majority of smaller vendors lack strong retail presence, which limits them mostly to online selling. In contrast, larger

global players have a comparative advantage in terms of global presence and brand recognition.

The global Door Phone market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of Door Phone.
