Abstracts

According to our (Global Info Research) latest study, the global Double Drum Vibratory Rollers market size was valued at US\$ 2573 million in 2025 and is forecast to a readjusted size of US\$ 3813 million by 2032 with a CAGR of 5.8% during review period.

In 2025, global sales of double drum vibratory rollers are projected to reach 50,000 units, with an average selling price of US\$50,000 per unit. Double-drum vibratory rollers are heavy machinery widely used in road construction, airport runways, parking lots, and other projects. Their main features include two large steel drums and a vibration system, which compacts soil, asphalt, or concrete through drum vibration, thereby improving ground bearing capacity and ensuring road surface smoothness and stability. This equipment is suitable for large-scale construction projects, especially in foundation treatment and road repair, providing efficient compaction operations.

Upstream raw materials mainly include high-strength steel, hydraulic components, engines, and vibration systems, while downstream supplies primarily go to construction companies, road construction companies, and various heavy machinery rental companies. In the future, with further increases in infrastructure construction and rising demand for efficient construction equipment, the double-drum vibratory roller market will continue to expand. Furthermore, the global promotion of green and smart building requirements is driving the development of machinery towards energy conservation, environmental protection, and intelligentization, further promoting innovation and application of this type of roller. Total production capacity is projected at 80,000 units, with a gross profit margin of approximately 25%.

With the growth of market demand and the improvement of technology, the production

efficiency of road rollers will be further improved, and the consumption of upstream raw materials will be gradually reduced. It is expected that the market will continue to play an important role in infrastructure construction, providing abundant business opportunities and growth potential.

This report is a detailed and comprehensive analysis for global Double Drum Vibratory Rollers market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Double Drum Vibratory Rollers market size and forecasts, in consumption value (\$ Million), sales quantity (K Units), and average selling prices (US\$/Unit), 2021-2032

Global Double Drum Vibratory Rollers market size and forecasts by region and country, in consumption value (\$ Million), sales quantity (K Units), and average selling prices (US\$/Unit), 2021-2032

Global Double Drum Vibratory Rollers market size and forecasts, by Type and by Application, in consumption value (\$ Million), sales quantity (K Units), and average selling prices (US\$/Unit), 2021-2032

Global Double Drum Vibratory Rollers market shares of main players, shipments in revenue (\$ Million), sales quantity (K Units), and ASP (US\$/Unit), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Double Drum Vibratory Rollers

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Double Drum Vibratory Rollers market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include BOMAG, Caterpillar Inc., Sakai America, Volvo Construction Equipment, CASE Construction Equipment, SANY, YTO Group, XUGONG, KETAI, LONGGONG, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market Segmentation

Double Drum Vibratory Rollers market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.

Market segment by Type

Single Frequency, Single Amplitude

Dual Frequency, Dual Amplitude

Multi-frequency / Variable

Market segment by Operating Weight
