Abstracts

The global Double Edge Safety Razor Blades market size is expected to reach \$ 1169 million by 2032, rising at a market growth of 2.0% CAGR during the forecast period (2026-2032).

Double edge safety razor blades are thin, replaceable shaving blades designed for use in double edge safety razors. Each blade has two sharpened cutting edges, allowing users to shave with either side of the razor head. These blades are usually made from stainless steel or carbon steel and may be coated with platinum, chromium, ceramic, or PTFE to improve sharpness, smoothness, corrosion resistance, and comfort. Compared with cartridge razor blades, double edge safety razor blades have a simpler structure, lower replacement cost, and less plastic waste. They are widely used in traditional wet shaving, personal grooming, and professional barber services.

Global production capacity is approximately 10 billion units.

In 2025, global sales reached approximately 8.2 billion units, with an average price of around US\$ 124 per k units, gross margin around 18%.

The double edge safety razor blades represent a mature but resilient segment of the global shaving products market. Although cartridge razors and electric shavers remain dominant in mainstream grooming, double edge blades continue to maintain strong demand because of their low cost, close shaving performance, sustainability advantages, and loyal wet shaving consumer base. Future opportunities will come from premium coated blades, stainless steel products, eco-friendly packaging, online sales, and professional barber channels. Competition will focus on sharpness, smoothness, durability, skin comfort, corrosion resistance, pricing, brand reputation, and distribution capability. The market is expected to remain stable with selective premium growth.

Market Trend

The double edge safety razor blades market is benefiting from the revival of traditional wet shaving and increasing consumer interest in sustainable grooming products. More consumers are shifting from disposable razors and cartridge systems to metal safety razors because double edge blades are economical, recyclable, and suitable for a premium shaving experience. Stainless steel and coated blades are gaining popularity due to better corrosion resistance and smoother shaving performance. Online retail, shaving communities, subscription services, and international niche brands are expanding product visibility. At the same time, eco-friendly packaging and premium blade positioning are becoming important trends in developed markets.

Market Drive

The main driver of the double edge safety razor blades market is the growing demand for cost-effective, high-quality, and environmentally friendly shaving solutions. Double edge blades are much cheaper per replacement than cartridge blades, making them attractive to both individual consumers and professional barbers. Rising awareness of plastic waste from disposable shaving products is also encouraging consumers to adopt metal safety razors and recyclable blades. The expansion of men's grooming, premium personal care, and traditional barber culture further supports demand. In addition, e-commerce platforms make it easier for consumers to access different blade brands, coatings, sharpness levels, and shaving styles.

Upstream and Downstream

The upstream supply chain of double edge safety razor blades includes stainless steel strip, carbon steel, coating materials, grinding wheels, polishing compounds, blade wrapping paper, dispensers, packaging materials, and precision blade manufacturing equipment. Key upstream suppliers include steel producers, coating material companies, abrasive suppliers, machinery manufacturers, and packaging companies. Midstream manufacturers are responsible for blade stamping, heat treatment, grinding, honing, coating, cleaning, inspection, packaging, and branding. Downstream customers include shaving product brands, safety razor manufacturers, barbershops, supermarkets, pharmacies, wholesalers, e-commerce platforms, grooming subscription companies, and individual wet shaving consumers.

This report studies the global Double Edge Safety Razor Blades production, demand,

key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Double Edge Safety Razor Blades and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Double Edge Safety Razor Blades that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Double Edge Safety Razor Blades total production and demand, 2021-2032, (M Units)

Global Double Edge Safety Razor Blades total production value, 2021-2032, (USD Million)

Global Double Edge Safety Razor Blades production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (M Units), (based on production site)

Global Double Edge Safety Razor Blades consumption by region & country, CAGR, 2021-2032 & (M Units)

U.S. VS China: Double Edge Safety Razor Blades domestic production, consumption, key domestic manufacturers and share

Global Double Edge Safety Razor Blades production by manufacturer, production, price, value and market share 2021-2026, (USD Million) & (M Units)

Global Double Edge Safety Razor Blades production by Type, production, value, CAGR, 2021-2032, (USD Million) & (M Units)

Global Double Edge Safety Razor Blades production by Application, production, value, CAGR, 2021-2032, (USD Million) & (M Units)

This report profiles key players in the global Double Edge Safety Razor Blades market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Procter & Gamble Gillette, Edgewell Personal Care, BIC Group, Vidyut Metallica, Lord, Malhotra Shaving Products, Samah Razor Blades, Treet Corporation, Feather Safety Razor, Feintechnik, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Double Edge Safety Razor Blades market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), volume (production, consumption) & (M Units) and average price (USD/K Units) by manufacturer, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
