According to our (Global Info Research) latest study, the global Double Head CNC Lathes market size was valued at US\$ 6198 million in 2024 and is forecast to a readjusted size of USD 7839 million by 2031 with a CAGR of 3.2% during review period.

The double head CNC lathe is equipped with two independent but synchronously controlled CNC systems, each of which controls a spindle and the corresponding tool system, so as to realize simultaneous processing of both ends of the workpiece, significantly improving production efficiency and processing accuracy. By processing both ends of the workpiece at the same time, the number of clamping times and auxiliary time are reduced, and the processing efficiency is greatly improved. It is particularly suitable for mass production and complex parts processing.
