## Abstracts

The global Double-Layer Structure Tent market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Double-layer structure tents refer to tents that can be camped outdoors. Usually, the functions include rainproof, sunscreen, windproof, breathable and temperature insulation. Structurally, hiking tents are mainly triangular (also known as herringbone), dome (also known as yurt) and house (also known as family). Triangular hiking tents are mostly double-layer structures, which are more complicated to support, and have better wind resistance, heat preservation, and rain resistance, and are suitable for mountaineering and adventure. The dome-shaped hiking tent is easy to set up, easy to carry, light in weight, and suitable for general leisure travel.
