## Abstracts

Double-layer boxes are an effective way to protect fragile devices, such as electronics. Although in some cases a single box or the original manufacturer's packaging can be used, in many cases the original equipment manufacturer's packaging is usually designed to ship the product only once instead of multiple times, making it difficult to ensure that the product is intact. Many double-layer boxes are designed to withstand the transportation process, including sorting effects, road vibrations, and other types of packaging handling.
