The global Double-Seat Golf Cart market size is expected to reach \$ 1938 million by 2032, rising at a market growth of 6.9% CAGR during the forecast period (2026-2032).

In 2025, global Double-Seat Golf Cart production reached approximately 176 k units with an average global market price of around US\$ 6,500 per unit, and a gross profit margin of approximately 20%-40%. Double-Seat Golf Carts are two-passenger low-speed vehicles mainly used for golf course transportation, short-distance mobility, patrol, service support, and leisure transportation. They are the most basic and widely used golf cart configuration, usually equipped with two seats, a steering system, braking system, suspension, canopy, windshield, battery or gasoline powertrain, controller, lighting, tires, and cargo or golf bag holder. Product types include electric two-seat golf carts, gasoline two-seat golf carts, lithium battery models, lead-acid battery models, foldable utility versions, and customized fleet models. They are widely used in golf courses, resorts, hotels, campuses, communities, tourist sites, and private mobility applications. The industrial chain of Double-Seat Golf Carts includes upstream steel frames, aluminum components, plastic body panels, lithium batteries, lead-acid batteries, gasoline engines, motors, controllers, chargers, axles, brakes, tires, seats, steering systems, suspension parts, lights, wiring harnesses, dashboards, windshields, canopies, and electronic control systems. The midstream includes vehicle design, chassis fabrication, welding, painting, body assembly, battery or engine installation, motor and controller assembly, wiring, braking system assembly, seat installation, safety testing, road testing, quality inspection, and customization. Downstream applications include golf courses, resorts, hotels, campuses, gated communities, tourist attractions, parks, residential communities, event venues, and personal leisure mobility. Related services include fleet leasing, maintenance, battery replacement, charging system installation, spare parts supply, refurbishment, and fleet management.

The market for Double-Seat Golf Carts is growing steadily because two-passenger carts remain the standard configuration for golf course fleets, personal mobility, resort transportation, gated communities, and short-distance leisure use. Product development is focused on lithium-ion batteries, longer range, faster charging, lower maintenance cost, lighter frames, better comfort, stronger suspension, improved braking, connected fleet management, and street-legal low-speed vehicle features in some markets. However, battery cost, local low-speed vehicle regulations, seasonal golf-course demand, price competition, replacement cycles, and safety compliance remain challenges. Overall, the market is expected to maintain stable growth, driven by golf course fleet replacement, electrification, tourism and resort transportation, community mobility, and wider acceptance of compact low-speed electric vehicles.
