## Abstracts

The global Double-Sided Cable Manager market size is expected to reach \$ 1353 million by 2032, rising at a market growth of 5.3% CAGR during the forecast period (2026-2032).

In 2025, global Double-Sided Cable Manager production reached approximately 5,970 k units with an average global market price of around US\$ 155 per unit, and a gross profit margin of approximately 20%-40%. Double-Sided Cable Managers are cable organization systems installed between or alongside racks, providing cable routing and management on both sides. These devices are designed for high-density environments, enabling efficient separation and routing of large volumes of cables while maintaining proper bend radius and airflow. They improve accessibility, reduce congestion, and enhance system reliability in complex network infrastructures such as data centers and telecom facilities. The industrial chain of Double-Sided Cable Managers includes upstream materials such as steel, aluminum, plastic components, fasteners, and coating materials. The midstream consists of manufacturers integrating structural design, modular features, and installation systems to produce standardized cable management solutions. Downstream applications include data centers, telecom rooms, enterprise IT environments, and industrial network systems. The ecosystem also involves system integrators, distributors, and service providers offering installation, optimization, and maintenance services.
