Abstracts

According to our (Global Info Research) latest study, the global Double Wicket Bagger market size was valued at US\$ 1087 million in 2025 and is forecast to a readjusted size of US\$ 1619 million by 2032 with a CAGR of 5.9% during review period.

A double wicket bagger is an automated packaging machine designed to open, fill, and close pre-made wicketed bags using a dual-lane or dual-station configuration, enabling higher throughput compared to single wicket systems. These machines are widely used for packaging bakery products, fresh produce, frozen foods, household paper goods, and consumer packaged goods that require high-speed and consistent bagging operations. From a value chain perspective, upstream activities include mechanical frames, servo motors, PLC control systems, sensors, pneumatics, and bag materials, midstream processes focus on machine assembly, motion control integration, software programming, and performance testing, while downstream demand is driven by food processors, packaging converters, contract packers, and consumer goods manufacturers. In 2025, the average selling price of double wicket baggers is approximately US\$165,000 per unit, with global sales volume reaching around 6.4 thousand units. The industry maintains a 30%–45% gross margin, supported by automation value, customization requirements, and long equipment service life.
