According to our (Global Info Research) latest study, the global Downriggers market size was valued at US\$ 47.2 million in 2025 and is forecast to a readjusted size of US\$ 62.87 million by 2032 with a CAGR of 4.2% during review period.

Downriggers are fishing tools used to lower and position fishing lines at specific depths in the water. They consist of a vertical pole or rod, a reel with a steel cable, and a weight or 'cannonball' that is attached to the cable. The weight is lowered to a desired depth, and the fishing line is attached to the cable, allowing anglers to precisely control the depth of their bait. Downriggers are commonly used in deep-water fishing for species like salmon or trout, where adjusting the depth is crucial for targeting fish at different levels in the water column.
