Draft beer taps refer to the dispensing system used in bars, pubs, and restaurants to serve beer directly from kegs. The system typically includes a tap handle that, when pulled, allows beer to flow from a pressurized keg through a tap faucet and into a glass. This method of serving beer is often preferred for its ability to preserve the freshness and carbonation of the beer, as well as the ability to offer a variety of beer options on tap. Draft beer is generally considered to have a superior taste compared to bottled or canned versions due to the controlled environment in which it is stored and served.
