## Abstracts

According to our (Global Info Research) latest study, the global DRD Cans market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

Two-pieces cans are developed in replaced of three-piece cans that cause lead pollution. The two-piece can is a packaging container with the bottom end and the body shaped from one sheet of metal by deep drawing, with a second end seamed to the can to close it and form a complete package for sale. As the whole can is composed of two pieces, it is known as the two-piece can.

Compared with the three-piece can, the two-piece can has the following advantages: (1) The can body has no side seam, and there's no seam between the body and the bottom end, so the can is tightly sealed with less consumption of raw materials; (2) The can body can be fully decorated and printed; (3) The can making process is easy and efficient. However, it also has some disadvantages. For example, it requires excellent performance of the can-making materials and a high investment in equipment. Besides, can-making technologies, equipment and dies must be excellent as well.

2-Piece Can report published by QYResearch reveals that COVID-19 and Russia-Ukraine War impacted the market dually in 2022. Global 2-Piece Can market is projected to reach US\$ 42260 million in 2029, increasing from US\$ 34420 million in 2022, with the CAGR of 3.0% during the period of 2023 to 2029. Demand from Beer and Carbonated Drinks are the major drivers for the industry.
