Abstracts

This report studies the Dried Fruits and Edible Nuts market. Dried fruit is fruit from which the majority of the original water content has been removed either naturally, through sun drying, or through the use of specialized dryers or dehydrators. Dried fruit has a long tradition of use dating back to the fourth millennium BC in Mesopotamia, and is prized because of its sweet taste, high caloric and nutritive value, and long shelf life. Edible Nut is a hard-shelled seed consisting of an edible kernel or meat enclosed in a woody or leathery shell.
