According to our (Global Info Research) latest study, the global Drone Battery market size was valued at USD 1417.6 million in 2023 and is forecast to a readjusted size of USD 2527.7 million by 2030 with a CAGR of 8.6% during review period.

An unmanned aerial vehicle (UAV) (commonly known as a drone) is an aircraft without a human pilot on board. UAVs are a component of an unmanned aircraft system (UAS), which include a UAV, a ground-based controller, and a system of communications between the two. The flight of UAVs may operate with various degrees of autonomy: either under remote control by a human operator or autonomously by onboard computers referred to as an autopilot. Compared to crewed aircraft, UAVs were originally used for missions too 'dull, dirty or dangerous' for humans. While drones originated mostly in military applications, their use is rapidly finding many more applications including aerial photography, product deliveries, agriculture, policing and surveillance, infrastructure inspections, science, smuggling, and drone racing.

The key players of Drone Battery include Amperex Technology Limited (ATL), Sunwoda and Shenzhen Grepow, etc. The top three players hold a share over 29%.
