According to our (Global Info Research) latest study, the global Drone Battery Thermal Heating Bag market size was valued at US\$ 361 million in 2025 and is forecast to a readjusted size of US\$ 473 million by 2032 with a CAGR of 4.0% during review period.

A drone battery thermal heating bag is a specialized accessory designed to keep drone batteries warm in cold weather conditions. This is crucial because low temperatures can significantly affect the performance and lifespan of lithium-polymer (LiPo) batteries, which are commonly used in drones. When batteries are exposed to cold temperatures, their internal resistance increases, leading to reduced capacity, shortened flight times, and potential safety issues.
