Abstracts

The drone charging board/drone charging stand adopts advanced precise positioning and data communication technology to build an independent, weatherproof and powerful drone charging base station. When the drone lands on the charging pad, no matter where it is, it will return to the original position through the reset lever, and then automatically start charging. Multiple interfaces and serial ports are reserved in advance to increase system expansion and integration capabilities. Wireless drone charging means flexible charging calibration, universal drone compatibility, safer connectivity, and durability in harsh environments and weather conditions.
