The drone light show is performed by lit, synchronized and choreographed crews of drones that line themselves up into various aerial formations. Almost any image can be recreated in the sky by a computer program that translates the graphics into flight commands and communicates them to the drone.

The service provider will grasp the basic information of the flight site through the bird's-eye view of the aerial photography, and then conduct two-way confirmation through the satellite image to ensure that the flight airspace is far away from electromagnetic interference, and ensure the normal progress of the performance and the safety of viewing.

Secondly, the formation dance step design. This step is closely related to the needs of service buyers. Buyers (generally event organizers or governments, etc.) put forward their own requirements, and negotiate with service providers on technical difficulties and implementation costs to finalize feasible solutions. The effects that can be selected include exclusive logo, 3D pattern and text, etc.
