Abstracts

The global Drone Rental Service market size is expected to reach \$ 487 million by 2032, rising at a market growth of 8.4% CAGR during the forecast period (2026-2032).

Drone Rental Service refers to a service provider offering individuals, businesses, and government agencies the right to use a drone, along with its payload (camera/LiDAR/multispectral/thermal imaging), pilot/training, insurance, data processing, and maintenance, all within a specified rental period. Fees are calculated on an hourly/daily/weekly/monthly basis. This service replaces the one-time purchase of high-value professional drones by clients, providing a light-asset service model that meets short-term, project-based, seasonal, or trial needs.

The global drone leasing service industry is experiencing continuous growth. With the liberalization of low-altitude airspace and the increasing demand for digital inspection and spatial data collection across various industries, market demand is steadily increasing. Compared to direct procurement, drone leasing effectively reduces upfront investment, equipment maintenance, and technological iteration risks for enterprises, aligning with the trend of asset-light operations. Therefore, its penetration rate in industrial scenarios is continuously improving. The industry is transitioning from single equipment leasing to an integrated service model, gradually integrating value-added services such as pilot outsourcing, airspace application, operational insurance, and post-operation data processing and equipment maintenance. Downstream application demands are becoming increasingly diversified, covering multiple fields such as infrastructure inspection, geographic surveying, modern agriculture, public emergency response, film and media, and energy operation and maintenance, with customized leasing solutions for vertical scenarios becoming increasingly abundant. Simultaneously, the accelerated iteration of intelligent technologies and the continuous

updating of new industrial drones are prompting enterprises to prefer short-term leasing of the latest equipment to avoid the risks of asset idleness and technological obsolescence. The industry's compliance system is continuously improving, with flight control standards, operator qualifications, and insurance systems gradually becoming standardized, further ensuring the large-scale and standardized development of leasing services, resulting in strong long-term growth certainty for the overall industry.

This report studies the global Drone Rental Service demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Drone Rental Service, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Drone Rental Service that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Drone Rental Service total market, 2021-2032, (USD Million)

Global Drone Rental Service total market by region & country, CAGR, 2021-2032, (USD Million)

U.S. VS China: Drone Rental Service total market, key domestic companies, and share, (USD Million)
