A drop leg holster is a type of holster that attaches to the thigh, as opposed to being worn around the waist or hip. Also called “thigh carry”, drop leg platforms are popular among law enforcement and military personnel as they are used in conjunction with tactical holsters. Drop leg holsters work by attaching a clip or strap to the gun belt while having a holster attached to the thigh rig which is secured by one or more leg straps. This allows the user to draw their firearm more easily and quickly, as it is already in hand.
