Abstracts

A DEB, also known as a drug-coated balloon (DCB), is an advanced technology used in the treatment of coronary and peripheral arterial diseases. These diseases cause narrowing of arteries leading to blockages. A DEB is used along with paclitaxel, an anti-proliferative drug, which helps in removing plaque from the walls of arteries and widening them. DEBs are primarily used in the treatment of two types of diseases: Peripheral arterial diseases (PADs), and Coronary arterial diseases (CADs).

Scope of the Report:

This report focuses on the Drug Eluting Balloons (DEBs) in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Open heart surgeries and open peripheral surgeries can be life-threatening as they involve several complications. This is compelling surgeons to adopt MI techniques over traditional techniques since they ensure high accuracy, faster recovery, fewer post-surgery infections, reduced hospital stays and incision marks, and minimal complications. This will increase the demand for DEBs since they enhance surgical precision by providing a 3D view of the patient and allows the insertion of DEBs in an individual's body by enabling the manipulation of small surgical tools.

The DEBs market is characterized by the presence of several players. Vendors are coming up with various advanced technologies such as IN.PACT Admiral, Lutonix 035, SeQuent Please Neo, Elutax SV, Freeway, Advance 18 PTX and DIOR. This will drive the demand for DEBs and increase the sales volume and profit margins of vendors. The

availability of a substantial number of CE approved DEB products, an increase in the number of clinical trials, and the approval of certain DEB products by the US FDA, will offer significant growth opportunities to the vendors.

The worldwide market for Drug Eluting Balloons (DEBs) is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
