According to our (Global Info Research) latest study, the global Drug Integrated Polymer Fibers market size was valued at USD 58 million in 2023 and is forecast to a readjusted size of USD 74 million by 2030 with a CAGR of 3.6% during review period.

Drug integrated polymer fibers are used to create implantable textile devices using a combination of resorbable as well as non-resorbable polymers. These devices can be made from different materials and are available in custom sizes and shapes to meet specific biological requirements. With a rise in complexity along with technological innovations, textile devices are being designed to meet a broader range of applications than earlier which will boost the demand of drug integrated polymer fibers. Textiles are being considered as the logical choice for soft tissue repair including hernias, ligaments and tendons due to its fibrous nature of human body.

The global pharmaceutical market is 1475 billion USD in 2022, growing at a CAGR of 5% during the next six years. The pharmaceutical market includes chemical drugs and biological drugs. For biologics is expected to 381 billion USD in 2022. In comparison, the chemical drug market is estimated to increase from 1005 billion in 2018 to 1094 billion U.S. dollars in 2022. The pharmaceutical market factors such as increasing demand for healthcare, technological advancements, and the rising prevalence of chronic diseases, increase in funding from private & government organizations for development of pharmaceutical manufacturing segments and rise in R&D activities for drugs. However, the industry also faces challenges such as stringent regulations, high costs of research and development, and patent expirations. Companies need to continuously innovate and adapt to these challenges to stay competitive in the market and ensure their products reach patients in need. Additionally, the COVID-19 pandemic

has highlighted the importance of vaccine development and supply chain management, further emphasizing the need for pharmaceutical companies to be agile and responsive to emerging public health needs.
