The drum air bottle washer is a cleaning device that combines drum rotation with air blowing technology. It uses a rotating drum to roll and rub bottles and other containers, and at the same time uses air (which may be oil-free compressed air or purified air) to blow and wash the bottles to achieve the purpose of cleaning the bottles. In addition, according to production needs, some drum air bottle washers may also be equipped with auxiliary cleaning tools such as water spray devices and rotating brushes to further improve the cleaning effect.
