Abstracts

The global Drum Liners market size is expected to reach \$ 257 million by 2032, rising at a market growth of 4.9% CAGR during the forecast period (2026-2032).

Drum liners are typically constructed from polyethylene, and are designed to fit in either steel or plastic drums of various sizes. Available in multiple widths, liners help minimize drum cleaning and replacement (reducing waste) and prevent product contamination. They are used for storing and shipping a variety of materials, such as liquid and raw products, and can hold from a few gallons to over 50 gallons. Drum liners are available in various types, including round bottom, flat bottom, rigid and semi-rigid variations. These liners are often custom manufactured in various designs, with some featuring an anti-static composition.

North America is the largest region of Drum Liners, with a share about 30%, followed by Europe and Asia-Pacific, etc. CDF Corporation, Fujimori Kogyo, NITTEL, International Plastics and Protective Lining Corp are the learders of the industry, and top 10 manufacturers hold about 50% market share.

This report studies the global Drum Liners production, demand, key manufacturers, and key regions.
