## Abstracts

The global Drum Pump market size is expected to reach \$ 1045 million by 2032, rising at a market growth of 5.9% CAGR during the forecast period (2026-2032).

Drum pump refers to pumps that are used to empty barrels, tanks, IBCs and drums. Many liquids used on manufacturing and processing plants are delivered in 100 or 200 litre barrels and are too heavy to tip to empty the liquids inside. Drum pumps consist of a vertical shaft inside a narrow tube which fits inside the drum opening. The pump motor is attached to the vertical shaft at the top of the tube outside and above the drum and the pumping element is located at the end of the shaft inside the drum. This configuration allows the drum to be emptied without tipping and so reduces the risk of spills and operator injury.

China is the largest Drum Pump market with about 43% market share. Europe is follower, accounting for about 20% market share.

The key players are Lutz Pompen, ARO, Flux, KIJKA, New Pig, Xylem, Fluimac, Koshin, Serfilco, Finish Thompson, NZ Pump, Ambica Machine, ATM, JiangSu Orient, TNT, Fengyuan, China Success, Shanghai Yangguang, Shanghai Shangwo etc. Top 3 companies occupied about 28% market share.
