According to our (Global Info Research) latest study, the global Dry Chemical Powder Fire Extinguishing System market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

A dry chemical powder fire extinguishing system is a type of fire suppression system that uses dry chemical powder to extinguish fires. This system is commonly used in industrial settings, such as manufacturing plants, warehouses, and chemical storage facilities. The dry chemical powder used in these systems is typically a mixture of monoammonium phosphate, sodium bicarbonate, or potassium bicarbonate. When discharged, the powder forms a blanket over the fire, smothering it and preventing it from spreading.

The Dry Chemical Powder Fire Extinguishing System market is experiencing a steady growth trend, with increasing demand for fire safety equipment in various industries such as manufacturing, oil and gas, and automotive. The major sales regions for these systems include North America, Europe, and Asia Pacific, with North America leading in terms of market share. The market concentration is high, with a few key players dominating the industry, such as Tyco Fire Protection Products, Amerex Corporation, and Buckeye Fire Equipment. However, there are also opportunities for new entrants to innovate and introduce advanced technologies in the market.
