According to our (Global Info Research) latest study, the global Dry Construction Material market size was valued at USD 97500 million in 2023 and is forecast to a readjusted size of USD 134380 million by 2030 with a CAGR of 4.7% during review period.

This report studies the Dry Construction Material market. Building material is any material which is used for construction purposes. Many naturally occurring substances, such as clay, rocks, sand, and wood, even twigs and leaves, have been used to construct buildings. Apart from naturally occurring materials, many man-made products are in use, some more and some less synthetic. The manufacture of building materials is an established industry in many countries and the use of these materials is typically segmented into specific specialty trades, such as carpentry, insulation, plumbing, and roofing work. They provide the make-up of habitats and structures including homes. But, dry construction material uses dry materials such as gypsum board, plywood, or wallboard in construction, without the application of plaster or mortar.

Global Dry Construction Material key players include Knauf, Saint Gobain, BaoWu, USG, ArcelorMittal, etc. Global top five manufacturers hold a share about 15%. China is the largest market, with a share about 30%, followed by Europe and North America, both with a share about 20 percent. In terms of product, Gypsum Board is the largest segment, with a share about 60%. And in terms of application, the largest application is Wall, followed by Ceiling, Flooring, etc.

The Global Info Research report includes an overview of the development of the Dry Construction Material industry chain, the market status of Wall (Metal, Wood), Ceiling
