Abstracts

The global Dry Construction Material market size is expected to reach \$ 154720 million by 2032, rising at a market growth of 4.8% CAGR during the forecast period (2026-2032).

This report studies the Dry Construction Material market. Building material is any material which is used for construction purposes. Many naturally occurring substances, such as clay, rocks, sand, and wood, even twigs and leaves, have been used to construct buildings. Apart from naturally occurring materials, many man-made products are in use, some more and some less synthetic. The manufacture of building materials is an established industry in many countries and the use of these materials is typically segmented into specific specialty trades, such as carpentry, insulation, plumbing, and roofing work. They provide the make-up of habitats and structures including homes. But, dry construction material uses dry materials such as gypsum board, plywood, or wallboard in construction, without the application of plaster or mortar.

Global Dry Construction Material key players include Knauf, Saint Gobain, BaoWu, USG, ArcelorMittal, etc. Global top five manufacturers hold a share about 15%. China is the largest market, with a share about 30%, followed by Europe and North America, both with a share about 20 percent. In terms of product, Gypsum Board is the largest segment, with a share about 60%. And in terms of application, the largest application is Wall, followed by Ceiling, Flooring, etc.

This report studies the global Dry Construction Material production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Dry

Construction Material and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
