Abstracts

Dry eye disease is a condition that affects the tear film and ocular surface. It is medically known as keratoconjunctivitis sicca. It is an ocular disorder caused by the lack of tear fluid to lubricate the eyes. There are primarily two types of dry eye conditions. One is aqueous tear-deficient dry eye, and the other one is evaporative dry eye. Dry eye syndrome is one of the most common eye disorders around the world and is particularly common in the geriatric demographic.
