A Dry Eye Treatment Machine is a medical device that is used to treat dry eye syndrome. This machine uses a combination of heat therapy and massage to stimulate the tear glands and encourage the production of natural tears. The heat therapy helps to open up the oil glands in the eyelids, which can become blocked and prevent tears from spreading across the surface of the eye. The massage function of the machine helps to improve blood flow to the eyes and reduce inflammation, which can also contribute to dry eyes. Overall, a Dry Eye Treatment Machine can be an effective way to manage symptoms of dry eye syndrome and improve overall eye health.
