The dry fire hose reel system is a firefighting equipment system that consists of multiple key components, including valves, input pipes, spokes, support frames, rocker arms, hoses, and spray guns (or nozzles). The dry fire hose reel system is a firefighting device that can extinguish an initial fire by quickly unfolding the hose and spraying the fire extinguishing agent when a fire occurs. The system is particularly suitable for industrial sites, such as chemical plants, oil depots, warehouses, etc. These sites usually have a high risk of fire and have high requirements for the performance and reliability of firefighting equipment.

Automotive is a key driver of this industry. According to data from the World Automobile Organization (OICA), global automobile production and sales in 2017 reached their peak in the past 10 years, at 97.3 million and 95.89 million respectively.
